

G+AU GE

SIMULATION-ENGINE TRACK

1

Input & Setup

- 14 task Scenes
- Assets Geometry
- Initial Conditions

2

Simulation • Run Engine

3

Output

- Simulated rollout
- State (if available)

4

Observation Extraction

- Trajectories
- Keypoints
- Derived signals

5

Evaluation

- 6 metrics
- 3 Physics groups
- Coverage / Robustness

6

Reporting

- Scores
- Failure modes
- Leaderboard

REAL-WORLD EXPERIMENTS TRACK

Rigid Body (8)

Calibrated Data & Metadata

- Videos
- Physical metadata
- Annotations

Textile Body (6)

Ground-Truth Measurements

- Trajectories
- Physical quantities
- Uncertainty

Soft Body (8)

Task-Specific Metrics

- Trajectory / kinematics
- Dynamics / damping
- Deformation / strain

UNIFIED PHYSICAL EVALUATION

VIDEO WORLD MODEL TRACK

Seed 2.0

G

Wan

1

Input & Setup

- First frame
- Text prompt

2

Video Generation

- Generate rollout

3

Generated Video

- Predicted rollout
- Pixel space video

4

Observation Extraction

- SAM3 track
- Keypoints
- Derived signals

5

Evaluation

- 5 metrics
- 1 Physics group
- Coverage / Robustness

6

Reporting

- Scores
- Failure modes
- Leaderboard
